

Gazmor Abdiu *Software Developer*

 Pristina, Kosovo  +38349531486  gazmorabdiu@hotmail.com  gazmorabdiu  gazmorabdiu

About Me

I'm a full-stack developer currently working with React and Ruby on Rails, focusing on building clean, maintainable, and scalable web applications. I'm actively strengthening my Rails expertise while continuing to grow as a full-stack engineer.

I also have strong practical experience with Node.js and NestJS, along with MongoDB, SQL/MySQL, Redis, and NATS, where I've built high-performance, scalable backend systems and microservices. I enjoy learning new technologies and taking on challenges, especially in environments that value clean architecture, efficiency, and well-structured solutions.

Professional Experience

12/2024 – Present Remote	Revealdata, Software Developer (Full Stack)  Working with an international client on a robust eDiscovery and legal holds platform, focusing on both frontend and backend development. This full-stack position is an exciting opportunity to expand my skills in React and Ruby on Rails, technologies I see strong potential in for future projects. <ul style="list-style-type: none">- Building and maintaining core product features using Ruby on Rails and React.- Contributing to a high-impact legal tech product used across international markets.- Collaborating closely with cross-functional teams to ensure smooth integration and delivery.- Continuously expanding my expertise in the Rails ecosystem, positioning myself for long-term growth in modern full-stack development.
Ice Software	
01/2025 – 04/2025 Pristina, Kosovo	Software Developer (Part Time) Initially hired full-time to lead critical improvements across our microservices architecture, I transitioned to a part-time role to continue supporting key projects and ensure a smooth knowledge transfer while pursuing new opportunities.
04/2024 – 12/2024 Pristina, Kosovo	Software Developer Lead initiatives to optimize and enhance our microservices architecture, continuously improving efficiency and scalability. <ul style="list-style-type: none">- Developing scalable microservices with NATS for low-latency messaging and rapid scaling.- Creating an in-memory storage solution that tripled performance.- Building a refund feature to improve user trust and transparency.- Enhancing data handling and caching with Redis, SQLite, and MySQL.- Mentoring interns to ensure smooth team integration.
11/2022 – 03/2024 Pristina, Kosovo	Appbites, Software Developer Specialized in Node.js, leading backend initiatives with NestJS to enhance application performance and support flexible, scalable solutions. <ul style="list-style-type: none">- Developing scalable backend services with Node.js and NestJS.- AWS Integration: Implemented Amazon S3 for file storage and Amazon Personalize for tailored video recommendations.- Database Management: Utilized MongoDB with Prisma for efficient data management.- Real-Time Chat with socket.io: Created interactive user-to-user and group chat with indicators.- Leadership in Case Management: Led backend database design and use cases, enhancing legal case management.- Documentation and Mentorship: Created API documentation with Swagger and mentored junior developers.

Key Achievements

- **3x Performance Boost:** Created in-memory storage for faster microservices.
- **Refund Feature:** Enhanced transparency and user trust
- **Case Management System:** Led backend design for improved legal case handling.
- **API Documentation:** Provided clear Swagger docs for team efficiency.

Skills

Programming Languages Javascript, Ruby, Java, Python	Frameworks NodeJS, NestJS, ReactJS, ExpressJS
Databases SQL, NoSQL, MongoDB, Mysql, Sqlite	Architecture & Concepts Sockets, Microservices
Others Git, Docker, OOP, JSON, Nats, Redis, Aws - s3, aws - personalize, Rest API	Soft Skills Adaptive, Problem solver, Team player, Effective communicator, Quick learner

Education & Certifications

08/2025	Learn to Code with Ruby , <i>Udemy</i> ↗
04/2024 Pristina, Kosovo	ReactJS Development , <i>Innovation Center Kosovo</i> ↗
03/2024	The Ultimate MySQL Bootcamp , <i>Udemy</i> ↗
12/2022	Node.js, Express, MongoDB & More , <i>Udemy</i> ↗
2016 – 2020 Samsun, Turkey	Bachelor / Computer Engineering , <i>Ondokuz Mayıs University</i>
